

Quik Connect™ kits fuse the function and strength of Speed-Rail® with pure architectural design and unmatched performance.

Design Quik Connect™ exceeds the design expectations of typical modular picket railing with architecturally relevant infill options.

Easy to Install

With 9 Simple Kit Assembly options, Quik Connect™ integrates Speed-Rail® providing unrivaled railing strength with easy installation.

Performance

Quik Connect™ is a 100% aluminum system that provides unmatched stability and rust free performance in the toughest corrosion prone environments.

VERSATILITY + DURABILITY + AFFORDABILITY = ENDLESS POSSIBILITIES

- Unrivaled Architectural Design with simplistic modularity.
- Integrated with Hollaender's Speed-Rail® Structural Pipe Fittings, ensuring long-lasting performance and reliability.
- Engineered and designed with more than 75 years of American-Made manufacturing excellence.
- Exceeds all IBC load requirements for safety and structural stability.
